It is claimed that the work of many of the mines and farms of the country is being greatly hampered by the lack of inborers, this scarcity being causad not only by the conscription for the army that is practiced but the fear that they may be made victims of this policy of the government. It is not an unusual thing for a general exodus and hiding out of the able bedied men of the community to occur when a detachment of soldiers comes in sight. It is believed by men who are close observers of the situation that difficulty will be experienced by the government in recruiting the army up to a strength of 80,000 men as is provided for by the loan of \$10,000,000 gold, which was recently placed by minister of finance Ernesto Madero in New York and London.

It is possible, it is thought, that with the attraction of increased pay for the noidler culistments in considerable numbers may be obtained, but it is the general view that the old Diax practice of farcing men into the army when occasion required will be continued by the Madero government.

El Pasoans Refuse to Present Caims to the Concul's Office.

Charles R. Loomis, who represents several clients was unable to appear before the court but said that he would arrange to do so later in the week.

"The establishment of this court of inquiry, as it might be called, is an evidence of good faith on the part of the republic of Mexico," judges Richardson said Monday. "When you consider that the claimants were referred to the consultative commission by the American state department, where the claims would have to be heard in Spanish, and in spite of this, the government of Mexico has established a court to hear the evidence in these cases in English is ample evidence. I believe, of the good faith of Mexico. Since the claims arose, the Mexican government has been occupied with the task of bringing order out of chaos and of suppressing the present rebellion and it has had little time for civil matters. It required more than 50 years for the boundary dispute between the United States and Mexico to be settled, as governments move slowly in such matters."

There are 12 claims to be considered, judge Richardson says, one of which was presented by the city of 51 Paso for the loss of a barro, which was killed during the battle.

Two years ago when I was still premier I declared to the Associated Press that no such thought had entered into the consideration of my government. What I said then I repeat now, knowing that my statements represented truthfully the views of his majesty and his advisers Japan no more seeks to violate such a pledge than any other nation bound by similar agreement. Debs Points to Taft-Roose velt Battle as Disgraceful.

Chicago, Ill., June 17.—The first camtaign in which the Socialist party has had a complete ticket in every state, was opened here yesterday afternoon. Eugene V. Deba and Emil Seidel, the Socialist candidates for president and vice president, made the chief addresses. Both candidates spoke in Riverview park. Mr. Deba said in part: In this campaign there are but two parties and but one base. The socialied Republican and Democratic parties are substantially one in what they stand for, opposed to each other on no quostion of principle, but purely in a contest for the spoils of office.

We have before us in this city at this hour an exhibition of capitalist machine politics which lays have the true inwardness of the situation in the capitalist company. Nothing that any Socialist has ever charged in the way of corruption is to be compared with what Taft and Roosevelt have charged and proved upon one another. They are both good Republicans, just as Harmon and Bryan are both good Democrats—and they are all agreed that Socialism would be the ruin of the country." FOR AUTO INSURANCE

When the jam in the store had thinned sufficiently, the Texas street doors were opened and another relay admitted.
